## Skinscriptions

### Our Philosophy:

We customize our aesthetic treatments to meet the needs of your particular skin type, and we want you to relax and really enjoy your time at FIX. Toward that end, we offer a simpler spa menu than most, grounded in the belief that everything you (or we) put on your skin should actually be improving it, not just feeling good. You can actually change your skin—and feel great doing it—with the treatments on this menu.

All of our products are medical-grade, with active ingredients vetted by reams of scientific studies. What we don't offer is an extended menu of add-ons, upgrades, extras and the like. Why? It turns your private relaxation into a sales pitch, and that turns us off. If you have special requests or concerns for your treatment, speak up. Our aestheticians love to talk skin, and they're happy to get yours glowing.

One more note: Assume every treatment ends with a slathering of SPF 30. Our mission is to nourish and protect your beautiful skin, so we'll stop you at the door, confiscate your car keys—whatever it takes so you're protected against the ravages of that fiery wrinkle-maker in the sky.

## Skinscriptions

### The FIX™ Facial

Think of this as routine maintenance for beautiful skin. It includes deep steam-cleansing and gentle mechanical exfoliation, followed by a ceramide-rich hydrating treatment masque. All this, plus a muscle-melting neck and shoulder massage. A coating of antioxidant serum helps ward off UV damage.

75 minutes / \$ 145

### Fella Facial (men's facial)

Just like the FaceFIX, but tailored to a man's skin (less moisture, more cleansing and exfoliation). We would write more, but you know the guys won't read it.

75 minutes / \$ 145

### Super Soother (calming facial)®

Get the red out! Rosacea-sufferers, take heart: this facial is for you. First, we gently cleanse the face with a botanical-extract formula specially designed for cranky skin. Next, we apply a calming masque, stocked with skin-soothers chamomile, marshmallow, and green tea. Antioxidant serum, rich in vitamin C and anti-inflammatory Olive Leaf Extract, is massaged into the skin. As defense against further redness, we apply a coat of SPF 30 mineral sunscreen before we'll let you leave.

75 minutes / \$ 165

### FIX™ Zit facial (acne facial)

For those with chronic acne or as emergency treatment for the unexpected breakout, this facial can't be beat. The skin is deep-cleaned with a salicylic acid foam, then polished gently with ultra-fine exfoliating jojoba beads. A cooling purifying masque, rich in antimicrobial tea tree oil and oil-absorbing willow bark extract, helps to set the stage for fewer breakouts by leaving the pores clean and less inflamed. Antioxidant serum and oil-free moisturizer help hydrate the skin.

75 minutes / \$ 165

### Skin Mender (The Post-procedure or “What Have I Done?” facial)

For those of you who take the laser plunge, then get home and wonder what the heck you’re supposed to do until you heal, here’s your answer. It’s specially designed to enhance the recovery of sensitive, post-procedure skin. The treatment begins with a detergent-free cleansing coupled with ultra-gentle exfoliation, to lift dead skin cells from the surface without stripping the skin’s moisture. A growth-factor-packed recovery masque, rich in ceramides and hyaluronic acid, nourishes skin that’s still on the mend, while you relax and, we suggest, visualize just how gorgeous you’re going to look in a week or two. A dose of our post-procedure Rescue balm and—of course—sunscreen completes this treatment.

75 minutes / \$ 165

### Clockstopper (Antiaging facial)

This is the treatment for you if you’re above a certain age and you don’t want to be reminded of it each time you pass the mirror. Skin is cleansed with a chamomile wash, followed by a tingly resurfacing masque. This is followed in short order by a cooling and hydrating rescue masque. A growth-factor-rich cream helps seal in moisture.

75 minutes / \$ 190

### Peels So Good

#### Big Night Out Peel

This is the one to have a few days before your class reunion (or equivalently important event), when you need to dazzle ‘em with just how fabulous you look. Don’t let the “peel” part scare you—this smart mix of mandelic, malic, salicylic, and phytic acids plus resorcinol auto-neutralizes, so you won’t “over-peel.” It leaves skin feeling tighter and noticeably glowing after a single treatment. With repeated use, it promotes improved clarity, more even pigmentation, and better skin texture.

45 minutes / \$250

## Hydrafacial MD™ Treatment

This is a 3-step treatment: 1) surface exfoliation with a patented dermaplaning tip that simultaneously infuses the skin with a hydrating serum, 2) profoundly satisfying pore extraction using salicylic acid serum to sink deep into pores to loosen the sebum and bacteria, followed by gentle vacuum extraction to clear the debris away, and 3) infusion of a protective antioxidant serum or, if you really want a treat, an infusion of SkinMedica’s cult-favorite TNS Repair Complex, specially formulated for the Hydrafacial™ system. Best of all, the whole process takes about a half hour, and at the end your skin is hydrated and glowing. Isn’t that the point?

**60 minutes / \$225**

**With TNS / \$250**

## Hydrafacial™ GlySal Peels)

We offer 3 strengths of glycolic + salicylic acid peels in conjunction with our Hydrafacial™ treatment. Your aesthetician will determine which strength suits your skin.

**60 minutes / \$250**

## O2 Intraceuticals Oxygen Infusion

Hydrating treatment serum is misted onto the skin and then gently, deliberately infused into the skin with pure oxygen (killer of bacteria, foe of inflammation) under greater than atmospheric pressure. For those of you who cut Physics in high school, it’s simple—the extra pressure helps drive the serum quickly, deeply into the skin. The result? Major hydration and a noticeable (we’re not kidding) plumping of the skin. Plus, it feels fantastic. There’s no more relaxing treatment around that delivers this kind of beautiful. A must before those red carpet events—even if the red carpet is in your kids’ playground.

on its own	75 minutes / \$250
with EGF serum	75 minutes / \$275
added to another facial	15 minutes / \$50

## Microdermabrasion

Crystal-free mechanical exfoliation, done safely by expert hands. Better when booked just before one of our facial treatments, but not shabby at all as a stand-alone service.

**60 minutes / \$ 200**

**Added to another service / \$ 75**

## Waxing

Get hair-free with less sting. We stock a variety of hard waxes to accommodate all different types of hair and skin sensitivities. Be sure to tell our aestheticians if you use topical retinoids (e.g., Renova, Differin, Tazorac) or take Accutane.

## Tinting

The busy girl's solution to getting ready in the morning, tinting darkens the brows and/or lashes for a polished look without the daily drudgery of mascara and pencil. Lasts a few weeks, typically.
